

Role: Senior Engineer

Location: Belfast, United Kingdom

Salary: Competitive + benefits

Reporting to: Head of Engineering

AuditComply is a Belfast based technology company. A unique Enterprise Risk Management platform transforming the way enterprises manage, analyze & report on critical risk. AuditComply operates in highly regulated industries such as Automotive, Aviation, Food & Beverage, Oil & Gas, Finance, and Manufacturing with key fortune 500 clients situated throughout the UK, EU, US, Middle East and Asia Pacific regions.

Job Description

We are seeking a senior engineer to join us to improve and scale our systems. A person with experience in cloud-based tech with a firm hold on cutting-edge technologies, platforms, and applications will be an ideal match. Familiarity with Python (Django), iOS (Swift), Android (Java), and knowledge of the latest development techniques is key.

Responsibilities

- Understand the current application infrastructure and suggest changes to it.
- Define and document best practices and strategies regarding application deployment and infrastructure maintenance.
- Build upon the application's use of CI/CD pipeline and make suggestions for an improved stack.
- Engage with staff, customers and other people to design, develop, and implement new features from (and to) a well written spec.
- Plan multiple projects simultaneously. Estimate, track and complete projects on time and within guidelines.
- Manage, maintain and educate others via group sessions to further everyone's understanding of future changes to the platform.

Skills

- Experience with planning, designing, developing, architecting, and implementing cloud solutions.
- Experience with Python, Django, DRF, Docker
- Ability to demonstrate security best practices
- Experience with monitoring solutions such as CloudWatch, Prometheus, and the ELK stack.
- Ability to troubleshoot distributed systems.
- Experience with building or maintaining cloud-native applications.

Required Skills

- 2yrs+ Python & Django experience
- 2yrs+ AWS experience
- Proven track record of developing a web platform
- Experience in managing and manipulating large data volumes
- Strong communication skills; oral, written and presentation
- Strong organisation, planning and time management skills to achieve results
- Ability to manage and maintain standards related to ISO 27001

Benefits & Perks

- Career & growth opportunities
- Better compensation for AWS developers
- Medical Insurance
- Proactive support
- Incentives

Cultural fit

- **Make it happen** - We own things and get them done whatever it takes.
- **We have fun** - We like to have fun while we're working and we love positivity.
- **We're in it together** - We all have our roles to play but we're always available to help for the greater good of the business. The successful candidate should have a collaborative and mentoring approach to leading, developing and upskilling the team.
- **Know your stuff & keep learning** - We value people who have a passion for learning & self-improvement.
